- Assist in performing adult autopsies and intraoperative frozen sections.
- Work with autopsy attendings, frozen section service attendings, pathology assistants, pathology residents and other rotating medical students.
- Attend relevant didactic seminars such as autopsy conference.
- Ideal for students interested in general surgery, surgical subspecialties, internal medicine, radiology, emergency medicine or pathology.
- Constraints: Maximum of 1 student per month and maximum 4 students per block.
- No students: XXX.

Cytopathology at Rhodes Hall

- Participate in the diagnosis of cytology specimens including pap smears, urine and fine needle aspirations.
- Work with cytology attendings, cytopathology fellow and pathology residents.
- Ideal for students interested in ob/gyn, interventional radiology, family medicine or pathology.
- Constraints: Maximum of 1 student per month and maximum 4 students per block.
- No students: XXX.

Neuropathology at Graves/Doan Hall

- Participate in the diagnosis of neurologic lesions including intraoperative frozen sections.
- Work with neuropathology attendings and pathology residents.
- Attend relevant didactic conferences and tumor boards.
- Ideal for students interested in neurosurgery, neurology or pathology.
- Constraints: Maximum of 1 student per month and maximum 2 students per block.
- No students: XXX.

-

Renal Pathology at Starling Loving/Doan Hall

- Participate in the diagnosis of medical renal diseases.
- Work with renal pathology attendings.
- Attend relevant didactic conferences and medical kidney conferences.

- Ideal for students interested in internal medicine, surgery (especially transplant surgery), family medicine or pathology.
- Constraints: Maximum of 1 student per month and maximum 2 students per block.
- No students: XXX.

Pathology Informatics at Hamilton Hall/James Cancer Center/Ackerman

- Participate and gain exposure to digital imaging, telepathology, automation, computer basics, database management, networks, security, laboratory information system and bioinformatics.
- Work with informatics attendings (Dr. Parwani) and technical staff.
- Ideal for students interested in medical technology, pathology or administration.
- Constraints: Maximum of 1 student per block.
- No students: XXX.

Transfusion Medicine at James Cancer Center and Rhodes Hall

- Participate in blood management requests and apheresis.
- Work with transfusion medicine attendings, transfusion fellow and pathology resident on service.
- Ideal for students interested in anesthesiology, general surgery, surgical subspecialties, emergency medicine, rheumatology, internal medicine or pathology.
- Constraints: Maximum of 1 student per month and maximum 4 students per block.
- No students: XXX.

Dermatopathology at Martha Morehouse

- Participate in the diagnosis of dermatopathology diseases.
- Work with dermatopathology attendings (Dr. Chung and Dr. Plaza) as well as residents and fellows.
- Ideal for students interested in dermatology, family practice or pathology.
- Constraints: Maximum of 1 student per month and maximum 3 students per block.
- No students: XXX.

ENT Pathology Doan Hall

- Participate in the diagnosis of ENT specimens including thyroid, salivary gland, upper aerodigestive tract and facial tumors (basal cell carcinoma, squamous cell carcinoma).
- Work with ENT pathology attendings and pathology residents.

- Ideal for students interested in ENT, endocrinology, family medicine, dermatology or pathology.
- Constraints: Maximum of 1 student per month and maximum 2 students per block.
- No students: 6/19/23-7/14/23.
